The magazine is designed in the fun style of a supermarket tabloid. Important information is presented through reader-friendly articles as well as how-to stories from local parents and teens who give real-life examples from their talks about sex.

Also included: an advice column, a quiz, an astrology feature, puzzles, a list of local family planning clinics and a special page "for men only."

Topics include how kids grow and change from age 9 to 18, how times have changed since today's adults were teens, signs that a teen is abused or an abuser, the risks of oral sex, and the importance of values in sexual decision-making.
